

**IF YOU'RE
LOOKING FOR
GREEN
SOLUTIONS
FOR UTILITY POLES,
NISUS CORPORATION
HAS THE ANSWER.**

We manufacture copper naphthenate under the QNAP™ brand and a disodium octaborate tetrahydrate (DOT) borate wood preservative under the Cellutreat® brand. QNAP can be used as a stand-alone treatment or in combination with poles that have been “pretreated” with Cellutreat. Pretreating poles with Cellutreat can also improve performance of poles treated with Penta, CCA, ACZA and creosote. Both QNAP and Cellutreat are EPA-registered “general use” preservatives and standardized by the American Wood Protection Association (AWPA). Let us show you how these products can create a greener utility pole program for your company.
