

SCOPE OF SERVICE FOR COMMERCIAL BUILDINGS

PRODUCT SUMMARY

- Niban and Niban-FG are 5% granular baits made with a patented formulation of attractants for the control of ants (except fire ants), carpenter ants, cockroaches, silverfish, crickets, earwigs, slugs and snails.
- Can be applied indoors or outdoors
- Formulated with a concern for the environment
- Niban is long-lasting and weatherized to remain attractive and withstand up to 4 inches of rainfall.
- Niban can be applied in and around factories, USDA Inspected meat and poultry plants, food handling establishments, food processing plants, hospitals, industrial plants, hotels, motels, nursing homes, offices, schools, supermarkets, public and private institutions, trains, trucks, warehouses, zoos, apartment buildings and other structures.
- Always refer to the Niban and Niban-FG labels for specific application information.

EXTERIOR AREAS:

Product applications, all structures

Apply Niban at the rate of 6 ounces per 100 square feet. Niban can be applied in a band 2-4 feet wide out from the building foundation for the control of ants, (excluding fire ants) crickets, cockroaches and earwigs. Niban can be allied into rodent bait stations for the control of slugs and snails or insects that consume and taint rodent bait placements. Niban can be applied around trees and into and around exterior garbage cans and dumpsters for ant and cockroach control. Niban is also labeled for insect treatment to recreational turf areas, greens of golf courses, ornamental nurseries, picnic areas and playing fields.

On turf areas, apply Niban at the rate of 2 pounds per 1,000 square feet. Exterior applications can be made by the patented Comfort Grip® product container, hand scatter, whirly-bird type applicator or other device designed to apply granular

baits. Niban is the preferred application for outdoor applications, but Niban-FG can be applied into crack and crevices in the exterior walls and also contained in exterior bait stations.

INTERIOR APPLICATIONS

A. Office Buildings:

Ants, cockroaches, silverfish and crickets

Niban and Niban-FG can be applied into cracks and crevices and under and behind desks and file cabinets. In break rooms, kitchens and bathrooms, apply Niban or Niban-FG into cracks and crevices, behind cabinets, into voids at plumbing penetrations, behind vending machines and in other areas where insects may enter or that may provide harborage. Niban or Niban-FG can be applied in a bellows duster type applicator at the rate of 2-6 puffs per linear foot. Niban can be applied in storage rooms, boiler rooms, utility rooms, attics, drop ceilings, basements and crawlspaces for the control of ants, silverfish and cockroaches (including American, oriental, brown and German) as well as for other insect infestations. In crawlspaces and attics, apply at the rate of up to 4 pounds per 1,000 square feet of surface area. Apply only in areas inaccessible to children and pets. Exterior perimeter applications are applied at the rate of 6 ounces per 100 square feet.

B. Manufacturing Plants:

Ants, cockroaches, silverfish and crickets

Niban or Niban-FG can be applied in a duster type applicator at the rate of 2-6 puffs per linear foot. In non-food production areas, Niban and Niban-FG can be applied under and behind equipment, under pallets, around loading doors and in other possible insect access points around the inside of the exterior wall of the building. Exterior perimeter applications are applied at the rate of 6 ounces per 100 square feet.

In office areas of manufacturing plants, Niban and Niban-FG can be applied into cracks and crevices and under and behind desks and file cabinets. In break rooms, kitchens and bathrooms, apply Niban or Niban-FG into cracks and crevices, behind cabinets, into voids at plumbing penetrations, behind vending machines and in other areas where insects may enter or that may provide harborage.

C. Food Processing Plants:

Ants, cockroaches, silverfish and crickets

Niban or Niban-FG can be applied in a duster type applicator at the rate of 2-6 puffs per linear foot. Avoid contamination of feed and foodstuffs.

Niban and Niban-FG can also be placed into indoor bait stations. Always document the number and location of all bait stations.

Food area application is limited to crack and crevice treatments only. Any bait visible after application must be brushed into cracks and crevices or removed. Crack and crevice application is 2-6 puffs per linear foot applied by a duster device. Exterior perimeter application is applied at the rate of 6 ounces of bait per 100 square feet.

In office areas of food processing plants, Niban and Niban-FG can be applied into cracks and crevices and under and behind desks and file cabinets. In break rooms, kitchens and bathrooms, apply Niban or Niban-FG into cracks and crevices, behind cabinets, into voids at plumbing penetrations, into openings around electrical conduits, behind vending machines and in other areas where insects may enter or that may provide harborage.

NOTE: In USDA inspected meat and poultry plants, Niban and Niban-FG can only be applied in inedible product areas and non-processing areas of the plant as a crack and crevice treatment.

D. Restaurants:

Ants, cockroaches, silverfish and crickets

Food prep area is limited to crack and crevice applications only. Do not contaminate feed and foodstuffs. Niban and Niban-FG can be applied under and behind refrigerators, coolers, stoves, sinks, dishwashers, motor rooms, counters, into openings around drains, water pipe and electrical conduits and into wall voids and cracks and crevices along baseboards, cabinets and closets. Rates are 2-6 puffs per linear foot with a dusting device. Any bait visible after applications must be brushed into cracks and crevices or removed. Apply in areas inaccessible to children and pets. Niban and Niban-FG can also be placed into indoor bait stations. Always document the number and location of all bait stations. Place bait stations in areas inaccessible to children and pets. Exterior perimeter applications are applied at 6 ounces per 100 square feet.

E. Schools and Day Care Centers:

Ants, cockroaches, silverfish, crickets and other listed pests

Always apply Niban and Niban-FG in areas inaccessible to children and pets.

Niban and Niban-FG can be applied into cracks and crevices and under and behind counters and file cabinets. In break rooms and bathrooms, apply Niban or Niban-FG into cracks and crevices, behind cabinets and into voids at plumbing penetrations. Apply behind vending machines and other areas where insects may enter or that may provide harborage. As a crack and crevice treatment, Niban or Niban-FG can be applied in a bellows duster type applicator at the rate of 2-6 puffs per linear foot. Niban can be applied in storage rooms, boiler rooms, utility rooms, attics, drop ceilings, basements and crawl spaces for the control of ants, silverfish, cockroaches (including American, oriental, brown,

German) and other insect infestations. **Cafeterias:** Food prep area is limited to crack and crevice applications only. Do not contaminate feed and foodstuffs. Niban and Niban-FG can be applied under and behind refrigerators, coolers, stoves, sinks, dishwashers, motor rooms and counters; into openings around drains, water pipe and electrical conduits; into wall voids and into cracks and crevices along baseboards, cabinets and closets. Rates are 2-6 puffs per linear foot with a dusting device. Any bait visible after

applications must be brushed into cracks and crevices or removed. All Niban and Niban-FG applications must conform to recognized school IPM programs and individual state school IPM laws and regulations. Exterior perimeter applications are applied at the rate of 6 ounces per 100 square feet.

MASS TRANSPORTATION:

Ants, cockroaches, silverfish and other listed pests

Apply Niban into cracks and crevices and voids of buses, ships, train cars, aircraft and other mass transit vehicles for control. Using a bellows type duster applicator, apply at the rate of one to two puffs of bait per lineal foot.

ADDITIONAL COMMERCIAL LOCATIONS:

Ants, cockroaches, silverfish and other listed pests

Apply Niban or Niban-FG by label directions as a perimeter or crack and crevice treatment to the following: apartment buildings, hospitals, grocery stores, hotels, kennels, motels, nursing homes, sewers, theaters, warehouses and other listed locations. When applying as a crack and crevice treatment, apply one to two puffs of bait per one lineal foot. When applying as an exterior perimeter application or as an area application, apply at the rate of 6 ounces of bait per 100 square feet.

ALWAYS READ AND UNDERSTAND THE LABEL BEFORE ANY APPLICATION.
