

NIBAN[®]

Granular Bait

Niban is a ready-to-use weather/moisture resistant granular bait used to kill and control ants (except fire ants), carpenter ants, cockroaches, crickets, earwigs, silverfish, snails and slugs.

Niban is a specially formulated weatherized granular bait that won't degrade in sunlight or heat and can last through up to 6" of rain. Niban also resists mold growth on the bait, providing pests with an attractive food source long after other baits break down.

Formulated with the element boron, an essential micronutrient found throughout nature, Niban poses a very low impact to the environment.

The NIBAN Advantage:

- #1-selling granular bait in the U.S.
- Available in a 10-lb bag, 40-lb box and 4-lb Comfort Grip[®] container
- Won't degrade in heat or sunlight; weather resistant up to 6" of rain
- Does not impact non-target species such as bees and butterflies

NIBAN. The #1-selling granular bait in the U.S.
