

DUAL STRIKE[®]

Cockroach Bait

When roaches infest, lure them in and strike twice. Dual Strike is a dual active roach bait that combines boric acid and fipronil with a brand-new bait matrix. It is designed to attract roaches and manage pest resistance. No population of insects is known to have developed resistance to borates. That means even if fipronil resistance is present, Dual Strike still performs.

Features:

- Dual active roach bait with 5% boric acid and .008% fipronil
- Available in a 4-pack or 10-pack
 - Master case contains 5 inner packs for a 20 or 50-piece master
 - Every pack includes 1 application tip per tube and 1 hand plunger rod per every 4-5 tubes
- Designed for synergy between active ingredients
- Helps manage pest resistance
 - Insects have not shown resistance to borates
 - If fipronil resistance is present in a population, borates still finish the job
- Unique bait matrix is highly attractive and stable in high moisture environments
 - Stays soft, edible, and pliable for >3 months
- Ideal for use in a rotation with other baits like Magnetic Roach Bait™
 - Active ingredient and bait matrix rotation helps keep bait aversion and resistance at bay
